EXAMINER'S REASONS FOR ALLOWANCE

1. Independent claim 1, 24, 25, 27-29 are allowed- The following is a statement of reasons for the indication of allowable subject matter:

2. The cited references of record either singularly, or in combination, fails to teach and/or suggest the combined limitations set forth in each of claims 1, 24, 25, 27-29, including creation/distribution of a custom computer program (for each implementation) containing a set of instructions for recreating a specific "current" document by combining strings accordingly, as claimed. It is noted that the examiner interprets the instant claimed limitations specifically using Applicant's specification page 5 lines 4-25, especially lines 18-21, to which the applied changes (e.g. the new strings) are fully contained within the second program for recreating a current document.

Newly cited reference Krishna et al. ("Krishna"), U.S. Patent No. 6,012,071 teaches updating/constructing a current document. However, Krishna fails to teach decomposing said current document into strings that do not occur in said base document (e.g. Krishna's URL strings). Krishna also does not teach that the applied changes themselves are fully contained within the program for reconstruction (e.g. within the claimed "second program").

Reference Sliger et al. ("Sliger"), U.S. Patent No. 6,466,999 teaches an executable software patch comprising instructions for altering a base document (i.e. an original program file with added program code (i.e. strings not occurring in said original file) to create a current file (an updated program file). However, Applicant claims a program which "recreates and displays the current document". Accordingly, Sliger's patch program acts upon internal program code intended for execution, the document (i.e. the modified code itself is never displayed by Sliger.

Newly cited reference (Towner – ACM article) teaches auto updating of document text. However, at the very least, Towner's implementation references external databases for its changes (deltas).

Regarding dependent claim 14, the examiner interprets "*substantially minimizing conflicts*" to mean conflicts are reduced as much as is reasonably possible. Support for this interpretation can be found in Applicant's specification page 6 lines 1 1-17, as well as Applicant's arguments set forth on page 2 of paper submitted January 4, 2005.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William L. Bashore whose telephone number is (571) 272-4088. The examiner can normally be reached on 11:30am - 8:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Herndon can be reached on (571) 272-4136. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
